**Synergies and links between EuroGEO, Copernicus, and national GEO activities**

What are the needs and concerns of the Action Groups, with regards to receiving advice and counseling. Is there a need to facilitate their dialogue with national and regional GEO structures and initiatives, including Copernicus and other data providers (ESA, EEA, RIs) ?

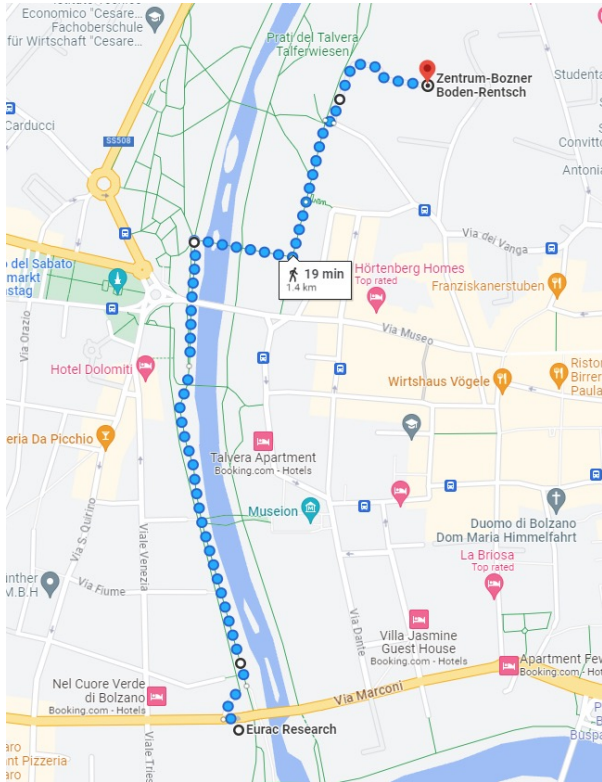

Achievements										
Challenges										
The way forward										

## Social event @ Castel Mareccio

Follow the groups after the final session – outside in front of registration area.
